

Ulead VideoStudio™ 9 SE DVD

Powerful Video Editing Made Easy

Ulead® VideoStudio™ 9 is easy-to-use software that turns great video moments into fun-to-watch movies. Use the two-step DV-to-DVD Wizard™ for the quickest way to get home movies edited and on disc, or advance to the powerful yet intuitive video editor with over 1000 effects, transitions and audio tools. Preserve finished movies - on VCD or DVD, on tape, or the Web - and share with family and friends.

Features and Benefits

Choose the Way You Want To Make Movies

- **Welcome Screen** makes things simple from the word go. Pick from three choices - including two easy-to-use Wizard modes or the standard VideoStudio Editor mode.
- **DV-to-DVD Wizard™**** simplifies the process of videomaking even more by providing the fastest route from DV tape to finished DVD. Hook up camcorder then use DV Quick Scan to choose the clips which will be used. Produce an authored DVD in just two easy steps - with menus, titles, transitions and music!
- **Movie Wizard** is ideal for users new to video editing. Select from 30+ theme styles to get started then let auto-editing make the first edits. Have complete movies with only three steps. Use the new auto pan & zoom to help create entertaining photo slideshows.
- **VideoStudio Editor** is complete with all the powerful tools needed to produce great-looking home movies while using an intuitive, step-by-step workflow. Spend time being creative rather than learning the program.

Automatic Functions

- **Auto-Edit** examines the properties of individual video clips and automatically removes poorly-shot scenes.
- **Second Generation Music Analysis Engine*** now detects rhythm patterns in the background music so that transitions between video clips and images can be made to the beat!
- **Auto Slideshow*** creates lively slideshows from photos. Setup auto pan & zoom for more dynamic slideshows, specify the duration for each image, set transitions and automatically match the transitions to the rhythm and duration of the background audio.
- **Time Stretch*** allows the fine tuning of the duration of video or audio clips to match other material on the timeline, without adversely affecting the audio pitch.
- **Ripple Editing*** makes removing portions of clips and arranging scenes easier, as it automatically adjusts the positions of elements like audio, titles and overlays in relation to the video.
- **DV Quick Scan*** shows exactly what is on the DV tape by automatically scanning it and giving a timecoded thumbnail list of all the clips. Then batch capture only the clips needed.
- **Auto Save*** keeps project from being lost if something goes wrong, by automatically saving it at set time intervals.
- **Scene Detection** finds scene breaks on the video and conveniently captures them as separate clips.

Easier to Learn and Use

- **Drag and Drop** images and video clips directly from Windows Explorer to the library for the fastest way to get all media together.
- **Multi-Trim Editing** allows the selection of multiple segments from videos and automatically place a rough cut on the timeline for further editing.
- **Instaview™ Real-time Previews** mean no more time waiting - view every effect and transition in real-time.
- **Shuttle Control*** allows the navigation to the exact scenes on the video.
- **Timeline Zoom Control*** allows to zoom into the details for a closer look or zoom out to get an overall view of the video project.
- **Enhanced Capture Options** provide a no-hassle capture experience. Select the capture method, and VideoStudio displays only the options needed.
- **Reverse Playback*** creates a fun visual effect by playing the video backwards.
- **Full Screen Preview** features one of the largest preview windows of any video editor, to see how the finished movie will look.
- **Library Organization** is made easy to sort videos, images and more, by the date, time or file name.

More Creative Tools and Content

- **Chroma Key*** is to create TV magic the way the pros do. Shoot the video subject against any uniformly colored background and then “fill in” the background with a file video or photo and be like in the Amazon jungle in an instant.
- **Flash Animation Overlay Support*** allows you to use Flash objects or clips, that have been saved with a transparency channel, as cartoon-style overlays.
- **Title Animation Support*** offers presets from the Library or custom made by mixing fonts, colors, gradients, and motion paths.
- **Pause Titles*** are cool opening titles, subtitles and credit rolls. Place multiple titles in a single frame and then animate them to start, pause or stop exactly on the clip.
- **Gridlines in Titles and Overlays** make it easy to align overlays and titles exactly on the clip.
- **Expandable Keyframe Window*** helps to decide exactly how and where each effect will change over time - it’s creative control like never before!
- **Save Image** helps grab any frame from the video as a still image. Then, uses these images in title backgrounds or menus to personalize videos even more.
- **Video Distortion*** is a creative tool to reshape images or video clips to fit into slanted or distorted overlay frames.
- **Video Mask Editing** allows the moving, resizing, and placing of masks, objects, or titles anywhere on the screen.

More Brilliant Filters and Effects

- **Over 1000 Customizable Effects, Filters, Transitions, and Title Styles** helps to create professional-looking movies. Simply drag and drop preset effects from the Library onto any selected clip or customize the effects to personalize the movie.
- **Transition Effects** makes shots flow smoothly from one to the next. Choose from over 120 fully-customizable transitions
 - **Masks*** are great new transitions that add more creative style to the video.
 - **Flashback*** is a fun new way for scenes to fade in and out.
- **Brilliant Video Filters and Effects** give videos a distinct and professional touch. Choose from filters such as Auto-Enhance and Brightness & Contrast which can improve the quality of the video.
- **All New Video Filters** give more choices to make the video clips stand out.
 - **Particle Filters** create a unique effect by overlaying random Clouds and Rain which can be customized.
 - **Video Pan and Zoom*** helps to pan across and zoom in on the details of favorite video clips.
 - **Strobe Motion Filter*** selectively speeds up or slows down portions of a video clip. See the part where the player kicks the ball in slow-mo, and then speed up the rest for the goal!
 - **Ghost Motion Filter*** creates a ghosting effect that is great for making kids’ “ghost” movies.

Add Music, Add Life

- **Audio Rubber-Banding** can separately adjust and fine-tune sound levels of the video, overlays, narration and background music - directly on the Audio timeline.
- **Duplicate Left or Right Channels*** gives the option of duplicating a single audio channel into right and left audio channels, helping achieve full stereo sound.
- **Audio Filters** such as Audio Normalization, Remove Noise, Amplify Volume, Long Echo, and Stadium Effect, can help fix any audio problem, or add just the right touch.
 - **Volume Leveling*** evens out the volume of loud and soft clips to ensure the movie’s volume is consistent across all clips.
 - **Audio Reverb*** is a great creative tool that adds a sense of acoustic space to the movies audio.

The Most Complete Solution

- **Capture Video from Anywhere** including your DV and DVD camcorder, VCR, Webcam, set-top DVD recorder, TV tuner, Digital TV or HDTV. You get easy connectivity and smooth transfer through all available capture devices.
- **Output Hardware Support** takes the guesswork out of choosing the project’s format. Make CDs and DVDs which can played on the PC or any standard DVD player.
- **Comprehensive Output Options** let you save the final version into most popular video formats. Audio and image files can also be exported in any of the supported formats.
- **16:9 Widescreen Support** creates widescreen movies for a true home theater experience. Even mix 16:9 and 4:3 in the same project without distorted aspect ratios.
- **Video E-mail** compresses short movies into e-mail-friendly versions and automatically sends them to recipients directly from within the program.zzz
- **Motion Menus*** make DVDs look professional with full motion buttons, as well as video and audio menu backgrounds.
- **Create Fully-interactive DVD Menus** and submenus for movies. Many ready-to-go templates are available, or substitute file images and video for a more personalized layout.
- **Streaming Video** converts productions to compact Web movies in Windows Media®, RealVideo® or QuickTime® format for easy access over the Internet.
- **Support for All Popular Formats** means to work with all of the common video, image and audio file formats.

Bonus Features

- **Neptune MediaShare** provides a ready space on the Web where to share movies with family and friends.
- **Movie Screensaver*** creates Windows® screensavers based on favorite slideshow or video clips complete with favorite music.
- **Batch Convert** converts all materials to the same format to ensure consistency for the best-quality output.
- **Smart Download**** provides download updates, add-ons and other content for VideoStudio - directly from the Ulead Web site.

Specifications

System Requirements

- Intel® Pentium® III 800 MHz or higher
- Microsoft® Windows® 98 SE, 2000, Me, XP
- 256 MB of RAM (512 MB or more recommended)
- 1.2 GB of available hard drive space for program installation
- 4 GB+ hard drive space for video capture and editing
- Windows-compatible display with at least 1024x768 resolution
- Windows-compatible sound card

Real-time features perform best with at least:

- Pentium® 4 2.4 GHz CPU, 512 MB RAM, 7200 RPM IDE hard drive

Input/Output Device Support

- 1394 FireWire cards for use with DV/D8 camcorders
- Support for OHCI Compliant IEEE-1394 and 1394 Adaptec 8940/ 8945
- Analog capture cards for analog camcorders (VFW & WDM support)
- USB capture devices and PC cameras
- CD-ROM, DVD-R/RW, DVD+R/RW, CD-R/RW, DVD-VR
- Sony® MicroMV™
- WMV HD, WMV Pocket PC, WMV Smartphone

Input File Format Support

- Video: AVI, DAT, DVD-Video, DVD-VR, DVD+VR, FLC, FLI, GIF, MPEG-1, MPEG-2, MPEG-4**, SWF, UIS, VSP, Windows Media Video (WMV, ASF)
- Image: BMP, CLP, EPS, FPX, GIF, ICO, IFF, IMG, JPG, PCD, PCT, PCX, PIC, PNG, PSD, PXR, RAS, SCT, SHG, TGA, TIF, WMF
- Audio: AIF, AIFC, AIFF, AU, Audio CD, MP3, MPA, WAV, WMA

Output File Format Support

- Video: AVI, FLC, FLI, FLX, MPEG-1, MPEG-2, MPEG-4**, RM, UIS, Windows Media Video(WMV, ASF)
- Image: BMP, JPG
- Audio: MPA, WAV, WMA
- Media: CD-R, CD-RW, DVD-R, DVD-RW, DVD+RW, DVD+R, DVD+R(Single/Double Layer), DVD-RAM (CPRM)
