

Photo Explorer 8.0

The All-in-one Tool for Your Digital Media

What's New

Ulead® Photo Explorer 8.0 provides an efficient way to transfer, browse, modify and distribute digital media. It is the all-in-one tool for owners of digital cameras, WebCams, DV camcorders, scanners or anyone who strives to effectively handle digital media.

Acquire

- Enhanced **Digital Camera Wizard** provides easiest access to download media from digital cameras or memory cards.
- New **Memory Card Detection** automatically starts data download when media is inserted in the memory card reader.
- New **Scan and Auto Slicing** greatly reduces the scanning process as it automatically divides multiple images into individual ones.

View & Organize

- Enhanced **performance on thumbnail generation** for speedy browsing.
- Supports **EXIF 2.2 Camera Info**. Show and edit data like date, time and shutter speed parallel to photos.
- New **Scan Folders** to generate thumbnails in advance to speed up the browsing performance.
- New **Add Descriptive Text** to images via the convenient input interface.
- New **List View** gains overview on file formats, file size or other defined image data.
- New **Photo Rating** increases sorting options by classifying images into either A, B or C categories.
- New **Native Zip support**. Browse, organize and work with Zip files as easily as with normal folders. Zip and unzip files without the need for a separate Zip program.
- New **Create Offline CD catalogs** by scanning and generating thumbnails from photo CDs. Keep the thumbnails available for browsing and searching even after taking the CD out.
- Enhanced **Search media** using names, description data or rating results. The search results appear in a separate folder for further processing.

Adjust

- Enhanced **Crop** enables crop with fix photo ratios.
- New **Histogram** adjusts the black, white and gray point of an image.
- New **Tone** creates sepia, duotone and monochrome tone effects.
- Enhanced **Lens Distortion** corrects spherical and trapezoid distortion easier using assistant line.
- New **Special Effects** including charcoal, emboss, mosaic, noise, oil paint, pinch, ripple, tile, colored pen, watercolor, whirlpool, or wind.
- New **Add Sound to Image** adds annotation or music to an image. The annotation can be embedded in metadata or in a separate file.
- New **Convert Images to Video** converts a series of images into a video clip.

Share

- New **Burn Slideshow CD** with transition effect, background music and video clips for displaying on the PC or on the TV.
 - The PC Slideshow CD includes Auto Run for playback.
 - The TV slideshow CD supports VCD and Photo VCD standard and can be played back on standard home DVD players.*
- Enhanced **Slideshow** features offer striking transition effects and using auto fade out for easier synchronization of background music and slides.
- Supports **Epson PRINT Image Matching II** for superior digital prints.

* Test the compatibility of DVD player before purchase.
