

CREATIVE INTELLIGENCE

Video ToolBox™ 2

Home Edition + 3GPP

Pioneering 3G Video Editing

Video ToolBox™ 2 – Home edition + 3GPP is easy-to-use digital media file conversion software. Using a PC, import video clips, photos and audio files and convert to popular formats including GIF, JPG, TIF AVI, MPEG-1, MPEG-2, as well as MPEG-4 and 3GPP -- common formats for portable media players and mobile phones. Video ToolBox's intuitive workflow offers quick video editing and photo enhancement tools so that users can easily create fun-to-watch videos and slideshows.

Features & Benefits

Import

- **Comprehensive Format Support** – Including 3GPP, 3GPP2, AVI, MPEG-1, MPEG-2, MPEG-4, WMV, and ASF. You won't need to worry about doing video conversions with external applications.
- **Video From Any Source** – From existing video, analog/DV camcorders, TV tuner cards, VCRs, and TV.
- **Import DVD/VCD Video** – Video can easily be imported from any non-copy-protected DVD (DVD+/-VR) and VCD discs.
- **Scene Detection** – Automatically split imported video scenes into separate clips – based on start/stop timecodes or changes in background scenery. Save time by not having to find each scene's exact split point.
- **Slideshow Images** – Import from DSC cameras, memory cards and local hard drives.

Edit

The Basic Tools

- **Simple Editing** – Arrange the order of video, join videos together and even edit out shaky scenes.
- **Storyboard View** – Simple and clear arrangement of videos and slideshows, so you can easily understand and control elements in your videos.
- **Auto-Enhancement** – With a single mouse-click, Video ToolBox auto-adjusts the hue, saturation, brightness and contrast of videos and photos. No more scenes that are under- or overexposed.
- **Image Rotation** – Rotate slideshow images, so all images are right-side up.
- **Two Editing Modes** – With two modes, Basic and Advanced, those new to video won't face a steep learning curve, while more experienced users will have the ability to adjust settings to suit their needs.
- **Real-time Preview** – Means no waiting for videos to render. By repeatedly previewing and editing, ensure your videos are just right before exporting.

Personalization

- **Stylized Videos** – Personalize and enhance any video in seconds with the choice of 8 fun, theme-based frames.
- **Great Transition Effects** – Dozens of professional-looking effects for eye-catching transitions between videos or slideshow images means more exciting videos for viewers.
- **Text Titles** – Set bold, italics, and color. You can convey just the right message with titles.
- **Enhanced Audio** – Include additional audio. Personalize videos with favorite music or even a voiceover tailored for family, friends, or colleagues.
- **No Garbled Audio** – Control the volume balance between original sound and added voiceover or music. Viewers will hear the audio the way you want it to be heard.

Output

- **The Latest Formats** – Flexible output to 3GPP, 3GPP2, AVI, MPEG-1, MPEG-2, MPEG-4, and WMV - all based on the your preferred sharing method.
- **Video/Audio Batch Conversion**- Saves time by converting a series of video files into any supported format, without the need for a separate application. With the Dolby® Digital Audio PowerPack** and the MP3 PowerPack*, you can also convert audio files between formats.
- **Image Batch Conversion** – Save time by converting a series of images into any supported format, without the need for a separate application. Great for reducing slideshow file size - for instance by converting a series of relatively large TIFF images to compressed JPEG images.
- **Slideshows Simplified** – Automatically convert any slideshow into the user-specified video format. Sharing a series of images is easy.

System Requirements

Minimum System Requirements

- Microsoft® Windows 2000, XP
- Intel® Pentium® III 800 MHz or higher
- 128 MB of RAM (256 MB or more recommended)
- 300 MB of available hard drive space for program installation
- 4 GB+ hard drive space for video capture and editing
- Windows-compatible display with at least 1024x768 resolution
- CDROM
- Windows compatible sound card

Input Device Support

- IEEE-1394/FireWire cards for use with DV/D8 camcorders
- Analog capture cards (VFW and WDM support) such as TV tuner cards
- USB 1.0 & 2.0 capture devices and PC cameras

*Requires purchase of Ulead Video ToolBox MP3 PowerPack.

**Requires purchase of Ulead Video ToolBox Dolby® Digital Audio PowerPack.

File Support

Import:

Video: 3GP, 3GPP2, ASF, AVI, DVD (DVD-R/RW, DVD+R/RW, DVD-RAM), MPEG-1, MPEG-2, MPEG-4, WMV

Audio: AC3**, AIF, AIFC, AIFF, AU, MP3*, WAV, MPA, MP4, WMA

Image: BMP, CLP, CUR, DCS, EPS, FPX, GIF, ICO, IFF, IMG, JPG, PCD, PCT, PCX, PIC, PNG, PSD, PXR, RAS, RLE, SCT, SHG, TGA, TIF, UFO, WMF

Export:

Video: 3GP, 3GPP2, DV AVI, MPEG-1, MPEG-2, MPEG-4, WMV

Audio: AC3**, MP3*, WAV, WMA

Image: BMP, CLP, CUR, EPS, FPX, GIF, ICO, IFF, IMG, JPG, PCX, PNG, PSD, PXR, RAS, RLE, SCT, TGA, TIF, UFO, WMF
