

# MediaStudio Pro 8 Hot Fix Release Notes

Version: 8.00.0033

Release Date: December 15, 2005

## About Ulead® MediaStudio® Pro 8

Ulead® MediaStudio® Pro 8 is powerful yet cost-effective digital video post-production software for professionals and enthusiasts. Create dynamic DV, MPEG or HDV video content for independent production, events, business and education. Step up into the world of professional real-time video production with HDV, Dolby Digital 5.1 Surround audio, single-track editing, and quick-to-master tools such as the new Smart Composer and Auto Music Generator. The new Smart Proxy mode allows collaborative and mobile real-time HDV editing, even on mid-range equipment. With Ulead's integrated family of digital tools, you can produce dynamic video content for DVD, tape or the Web.

## System Requirements

### Minimum requirements

- Microsoft®, Windows® 2000 with SP4 or XP
- Intel® Pentium® III compatible system (500MHz CPU)
- Microsoft® DirectX® 9
- 256MB RAM (512MB or higher recommended)
- 1GB of available hard disk space (10GB recommended)
- CD or DVD-ROM drive

### Real-time features perform best with at least:

- Pentium 4, 2.0GHz CPU
- 512MB RAM
- 7200rpm IDE dedicated hard drive
- PCI-Express Dual Head (AV Out) Graphics cards for output

## Installation

1. This Hot Fix can not be uninstalled

## Hot Fix items

- DVD MovieFactory 4 will not have to be re-installed after MediaStudio Pro 8 installation.
- In addition to SmartSound® Music CD, Auto Music now also supports SmartSound® Sound Palette CD.
- New Auto Music button image to synchronize with SmartSound® logo.
- Added the Product auto update feature. Now, you can launch AutoUpdate in MediaStudio Pro 8 program group. It will go online to check if any updater is available and then provides the option to download or not. No personal information will be sent out in AutoUpdate, only the necessary product information to check the updater availability.
